

VACCINES: PROTECTING YOU & YOUR COMMUNITY

WHY IT MATTERS

- VACCINES SAVE 3–4 MILLION LIVES EVERY YEAR(WHO).
- THEY HELP STOP THE SPREAD OF DANGEROUS DISEASES.
- PROTECTS PEOPLE WHO CAN'T GET VACCINATE.

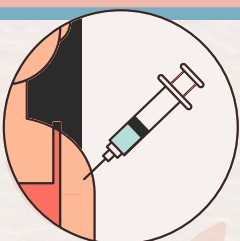

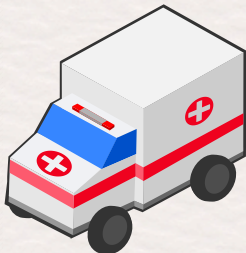

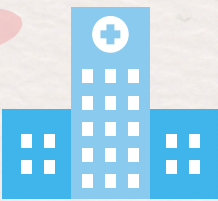

MISCONCEPTIONS VS. FACTS

MISCONCEPTION	FACT
VACCINES CAUSE THE DISEASE.	VACCINES ARE MADE FROM KILLED OR WEAKENED GERMS—THEY DON'T CAUSE ILLNESS.
NATURAL IMMUNITY IS BETTER.	VACCINES PROTECT WITHOUT THE RISK OF SEVERE DISEASE.
VACCINES AREN'T TESTED.	VACCINES GO THROUGH YEARS OF TESTING BEFORE APPROVAL.
TOO MANY VACCINES OVERWHELM THE IMMUNE SYSTEM.	OUR BODIES HANDLE MORE GERMS DAILY THAN WHAT'S IN VACCINES.

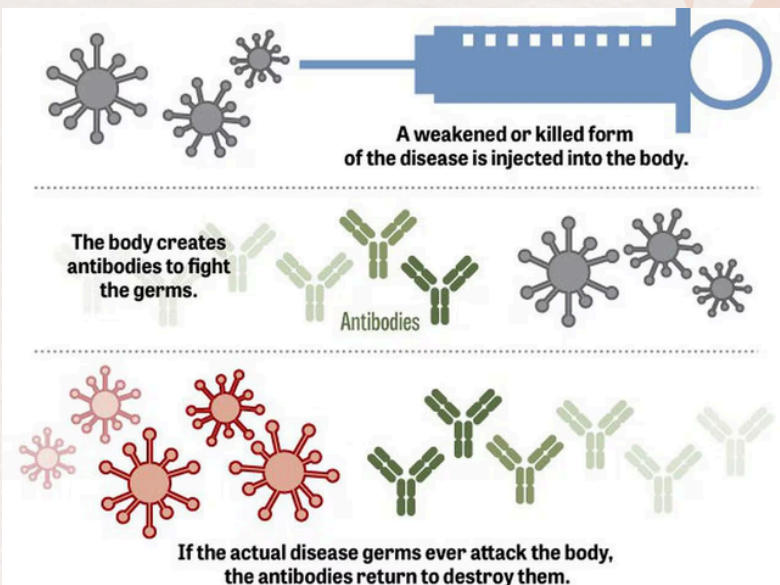

WHERE TO GET VACCINATED

- LOCAL PHARMACY (CVS, WALGREENS, ETC.)
- PRIMARY CARE DOCTOR
- COUNTY HEALTH DEPARTMENT
- COMMUNITY CLINICS (OFTEN FREE OR LOW-COST)

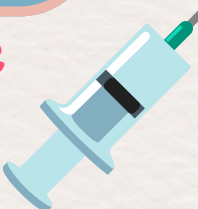

HOW VACCINES WORK

RECOMMENDED VACCINES

- CHILDREN: MMR, POLIO, DTAP, HEPATITIS B
- TEENS: HPV, MENINGOCOCCAL
- ADULTS: FLU SHOT (YEARLY), COVID-19, TDAP BOOSTER
- OLDER ADULTS: SHINGLES, PNEUMOCOCCAL

TAKE ACTION

- STAY UP TO DATE ON YOUR VACCINES
- ASK YOUR DOCTOR OR PHARMACIST IF YOU'RE UNSURE.
- VISIT [VACCINES.GOV](https://www.vaccines.gov) TO FIND A LOCATION NEAR YOU.
